Approved For Release 2005/08/16 : CIA-RDP90-00992R000100100062-2

9 November 1982

Excess Burroughs Equipment Status

1. The NSA owner of the AQS B6930 system called to inquire about any Tempest test results that may be available. He needs this information for site planning purposes.

STAT [redacted] the SAFE system Security Officer was asked to provide the specific information on the B6930 components and also the B7821 system. We also felt that since most of the new owners of SAFE equipment will possess classified information that the data be made available to them.

2. a MR. Russell Stokes of the Navy Supply Systems Command located near crystal city called to express intent in acquiring two of the five B6900 systems now at the TRW SAFE California facility. He currently has a installed Burroughs base and is in a upgrade process. He had been contacted by Don Cole, the Burroughs SAFE Marketing Representative and also had conversations with the IC staff [redacted] office) in regard the available equipment.

STAT

MR. Stokes address is:
NAVAL Supply Systems Command - 423
1921 JEFFERSON DAVIS Highway
Arlington, VA. 22202
Telephone 697-4505

3. Don Cole called to relay essentially the same message as MR. STOKES - that NSSC was interested. Don also indicated that he felt MR. STOKES organization meet Burroughs preference criteria of placement in the Intel Community (IC) of the SAFE Burroughs equipment. He is also MR STOKES Account Managers and had planned to propose B5900s as the upgrade EQUipment But felt obligated to propose this class SAFE EQUipment since this NSSC office is part of the IC. Don has also had discussions with the IC staff in regard this matter.

4 NOV 83

Don Cole called from NSA and asked that the Burroughs Manuals for the NSA 6930 that are stored in Northside Center be given to the TRUCK picking up the 4 Loaner drives next week and mark for him. He will deliver to NSA.

When queryed concerning his effort to find homes for the remaining B6900's (5) in Calif. he mentioned that he had met with [redacted] STAT and [redacted] STAT received assurances that if he had any idea on how to use the equipment [redacted] STAT Office would assist in placing him in contact with the proper people. He ~~is~~ Don stated he is running low on ideas now. He stated he has several dedicated System Applications such as procurement, RA & personnel

which is classed as non-operational types (this is INTEL related term — non-operational meaning support roles such as personnel, budget etc)

He ~~[redacted]~~ said he was concerned that DIA was able to use one of these systems that the CIA was getting rid of their only [b] Machine. Could there be a need for these non-operational packages in the Agency?
